

Session-8

1. Maximum Subarray:

```
class Solution {
    public int maxSubArray(int[] nums) {
        int current=nums[0];
        int max=nums[0];
        for(int i=1;i<nums.length;i++){
            current=Math.max(nums[i],current+nums[i]);
            max=Math.max(max,current);
        }

        return max;
    }
}
```

Output:

2. Find the Highest Altitude:

```
class Solution {
    public int largestAltitude(int[] gain) {
        int currentAltitude = 0;
        int maxAltitude = 0;

        for (int g : gain) {
            currentAltitude += g;
            if (currentAltitude > maxAltitude) {
                maxAltitude = currentAltitude;
            }
        }

        return maxAltitude;
    }
}
```

Output:

The screenshot shows a LeetCode submission interface. The top navigation bar includes 'Problem List', 'Accepted', 'Editorial', 'Solutions', and 'Submissions'. The submission status is 'Accepted' with 80 / 80 testcases passed, submitted by 'Rajeshsagala' on Sep 17, 2026 at 11:05. A banner for 'Unlock the Full LeetCode Experience' is visible. The performance metrics show a Runtime of 0 ms (Beats 100.00%) and Memory of 43.10 MB (Beats 38.32%). A bar chart displays the runtime distribution. The code editor shows a Java solution. The test result panel shows 'Accepted' with a runtime of 0 ms, and two test cases passed. The input for Case 1 is 'gain = [-5, 1, 5, 0, -7]' and the output is '1'.

Accepted 80 / 80 testcases passed
